TECH MENTORSHIP PROGRAM 2026

Participant Program Overview

Women Techmakers (Bambili × Gwarinpa) × TechBridge Foundation

1. About the Program

The Tech Mentorship Program 2026 is a free, virtual mentorship initiative designed to support aspiring and early-career women in technology through practical learning, mentorship, professional development, and community. The program brings together experienced professionals and passionate learners to create an environment where knowledge is shared, confidence is built, and participants are supported in their technology journey.

The structured mentorship runs for 12 weeks. Beyond the program period, participants become part of the wider community and may continue to benefit from networking, career support, and relevant opportunities shared through the community.

2. Program Structure

The Tech Mentorship Program 2026 runs virtually over 12 weeks (3 months). The program is divided into a general foundation stage followed by track-specific mentorship.

Stage	Period	Focus
Stage 1	Weeks 1– 4	General foundation sessions for all participants
Stage 2	Weeks 5 –12	Selected technical track, mentorship, assignments and project work
Final Stage	End of program	Project submission, showcase/Demo Day and graduation

3. General Foundation Stage: Weeks 1 – 4

During the first four weeks, all participants will take part in common sessions designed to build practical digital and professional skills before they move into their selected technical tracks.

Week	Topic	Focus
Week 1	AI & Prompt Engineering	Introduction to AI tools, prompt engineering and responsible AI usage.
Week 2	Graphic Design with Canva	Practical use of Canva for creating professional graphics and digital content.
Week 3	Social Media	Building a professional online presence and using social media for visibility and career development.
Week 4	Git, GitHub & Version Control	Intermediate-level introduction to version control, collaboration and working with Git/GitHub.

4. Track-Specific Mentorship: Weeks 5 – 12

Following the general foundation stage, each participant will continue with the technical track selected during the application process. Participants will be placed into designated track groups and assigned designated mentors who will guide them through technical learning, practical assignments and project development.

Technical tracks include:

- Frontend Development
- Backend Development
- Data Science
- Cybersecurity
- UI/UX Design
- Graphic Design

5. Learning Approach

The program follows a project-based learning approach. Participants are encouraged to actively build, practice, collaborate, ask questions, seek feedback, and apply what they learn.

- Technical mentorship sessions.
- Professional development and community activities.
- Weekly practical assignments and project work.
- Networking sessions and collaborative discussions.
- Ask-Me-Anything (AMA) sessions with industry professionals.
- Kahoot quizzes, virtual games and other interactive activities.

6. Attendance & Session Recordings

Attendance will be taken during scheduled mentorship sessions to monitor participation and engagement throughout the program. Participants are expected to attend sessions consistently and actively participate.

Mentorship sessions will be recorded where applicable. Recordings will be made available as part of the program's learning resources to support participants who need to review a session or revisit the material covered.

7. Learning Resources

- Live mentorship sessions.
- Session recordings.
- Presentation slides.
- Learning materials and reference guides.
- Weekly assignments and project briefs.
- Shared resources through Google Drive or a partner-supported learning platform.

8. Mentors & Participant Groups

Participants will be assigned to designated groups based on their selected tracks. Each track will have a designated mentor(s) responsible for guiding participants through the technical phase.

Mentors will deliver technical sessions, prepare learning materials, design practical assignments, review participant work, provide feedback, support technical discussions, and share relevant opportunities where available.

9. Participant Responsibilities

Participants are expected to:

- Attend scheduled sessions consistently.
- Complete weekly assignments and project work.
- Participate actively in discussions and community activities.
- Demonstrate professionalism, respect and collaboration.
- Take ownership of their learning and personal development.
- Ask questions, seek feedback and communicate when support is needed.
- Stay engaged with the official mentorship communication channels.

10. Project Development, Demo Day & Graduation

During the track-specific phase, participants will develop practical projects with guidance and feedback from their mentors.

At the end of the program, participants will submit and showcase their final projects during a Demo Day. Participants who successfully complete the program will receive Certificates of Completion. Mentors, organizers, guest speakers and partners may receive Certificates of Appreciation for their contributions.

11. Community & Continued Opportunities

The mentorship is also an opportunity to build relationships with peers, mentors and professionals. Participants are encouraged to remain engaged with the wider community after the structured mentorship ends and to take advantage of relevant opportunities shared with them.

12. Program Partners

The Tech Mentorship Program 2026 is organized through a collaboration involving:

- Women Techmakers Bambili

- Gwarinpa
- TechBridge

Further partner information and acknowledgements may be provided through official program communications.

13. Final Note

The Tech Mentorship Program 2026 is more than a series of classes. It is an opportunity to learn, build, connect with mentors and peers, and grow professionally. Participants are encouraged to make full use of the resources, mentorship, community and opportunities available throughout the program.

Welcome to the Tech Mentorship Program 2026. We look forward to learning and building with you!
